SUMMARY

Computer Science Senior (graduation expected June 2026) at the College of Computing and Information Technology at the Arab Academy for Science, Technology, and Maritime Transport. A passionate, highly dedicated, and hardworking individual with strong academic performance and extensive hands-on project experience. Motivated to gain professional industry exposure and further develop expertise in Web Development, Software Engineering, and UI/UX Design.

EDUCATION

College of Computing and Information Technology, Arab Academy for Science, Technology and Maritime Transport 2022 – 2026

Bachelor of Computer Science (Dual Degree with University of Northampton, UK)

- Transcript available upon request

Alexandria House of English, Alexandria, Egypt Graduated 2022

Cambridge Assessment International Education

KEY SKILLS

- **Programming Languages:** Java, C, JavaScript, Python, Shell, SQL, Kotlin
- **Web Development:** HTML, CSS, PHP
- **Frameworks:** JavaFX, Figma
- **Tools:** Android Studio, Firebase, Packet Tracer, Microsoft Suite
- Effective teamwork and collaboration
- Leadership in group projects
- Self-motivated and eager to learn
- Strong problem-solving skills

EXPERIENCE

Training – Integrated Simulators Complex, AAST July 2024

- Gained hands-on experience with advanced maritime simulation technologies.
- Developed analytical skills through interactive, real-time simulations.
- Redesigned chat file format and implemented backward compatibility features.

ICTHub Python Programming Scholarship April 2025

- Completed a merit-based training program on *Python fundamentals*, covering variables, loops, functions, and file handling.
- Built foundational coding skills through structured exercises and guided projects.
- Strengthened logical thinking and problem-solving using practical examples.

USAL Summer Course on AI, Cybersecurity & Communication University of Salamanca, Spain July 2025

- Participated in an international summer school focused on *Artificial Intelligence, Cybersecurity, and Digital Communication*.
- Attended expert-led sessions on Generative AI, AI Research Trends, and Cybersecurity Strategies, with workshops by *INCIBE* (The National Cybersecurity Institute of Spain).
- Engaged in hands-on group workshops applying AI and cybersecurity principles to real-world challenges

- Introduction to Temenos T24 core banking and its modules
- Learned basics of Java integration and SQL
- Explored Temenos Studio, Integration Framework, and DevOps tools used in banking projects

University Projects

Worked on software and simulation projects in both individual and group settings:

- **Web Development:** Created a health information website (HTML, CSS, JavaScript, PHP) and an online store database using SQL.
- **C / C++ Programming:** Developed a supermarket system, a library management tool and an animated seaside scene in with OpenGL/GLUT
- **Java Projects:** Built a GUI fitness app (JavaFX), SIC/XE assembler with loaders, Turing Machine simulator, and a women’s transport app (Android Studio).
- **Networking:** Designed a company network using Cisco Packet Tracer.
- **Cybersecurity:** Exploited the EternalBlue SMB vulnerability on Windows 7.
- **Simulation:** Modeled a city bus system using Python (SimPy) with realistic scheduling and probability distributions
- **Artificial Intelligence:** Built an AI agent that the user inputs information via text or voice, generates a professional CV, and scrapes online jobs based on user skills and experience.
- **Graduation Project – Seizure Detection & Prediction (In Progress):** Analyzing, designing, and developing a full system (front-end and back-end) to detect and predict seizures using machine learning based on smartwatch sensor readings, **built using Flutter.**

LANGUAGES

- English | Fluent
- Arabic | Native
